What makes Windows 8.1 Devices better?

- Run full Microsoft Office.*
- Offer multi-user capabilities keeping data and settings separate from other users.
- Provide a personalized Start screen where you can view people, apps and sites.
- Enable multitasking by snapping apps side-by-side.***
- Include USB ports.
- Support Adobe Flash and HTML 5.**
- Allow for up to 7 GB of free storage in the cloud for files, photos and videos with SkyDrive.
- Grant access to amazing apps in the Windows Store. With many, you can try before you buy.
- Sync contacts, settings, browsing history and more.†

* Office sold separately.
** With Internet Explorer 10.
*** Requires 1366 X 768 minimum screen resolution.
† Across any Windows 8 device with a Microsoft account.

Advantages of Windows 8 Devices.

Convenience & Mobility
- Super desirable, innovative post-PC devices - thin, light, long battery life
- No compromise touch and keyboard/ mouse input
- Always on, always connected
- Your Windows everywhere in sync with your Microsoft account

Connectivity
- Full Web – Internet Explorer 10 is immersive, fast & fluid, and supports full desktop sites including Adobe Flash and HTML5
- Live Tiles – connected to the people and things which matter most
- People app – Display your contacts and their latest status across your networks

Fun & Entertainment
- All the music you love - every way you want it
- The latest movies and TV shows you love, anywhere you are
- Awesome selection of casual and immersive games
- Access to amazing apps in the Windows Store

Productivity & Compatibility
- Run full Microsoft Office (sold separately)
- Broad and deep ecosystem compatibility
- Your Windows everywhere in sync through SkyDrive & SkyDrive Pro
- Real multitasking – snap apps side by side

Security & Safety
- Share your device more safely and easily – Full Multi-user support*; Windows protects the end-to-end boot process (Trusted Boot)**
- Ensure system integrity and instant access to your resources with UEFI and TPM solutions integrated within Windows 8.1 machines

Integration
- Deep management capabilities based on existing ConfigMgr installs
- Unified app development and deployment across PCs and tablets
- Virtualized desktops, apps, and user environment

*compared to iPAD; **compared to Android

Winning the customer with the new Windows – Windows 8 and Windows 8.1

Customers need the latest technology to be productive and competitive

Why should your customers get excited about the new Windows?

With Windows 8.1 your customers can:
- Get more done – multitask with up to four apps or sites open side-by-side at the same time
- New Bing-powered search returns results from across their devices, apps and the cloud.
- They get better browsing with Internet Explorer 11 – fast, fluid and perfect for touch and tablets.
- They will find the best apps and discover new favorites in the redesigned Windows Store.
- They can choose from new backgrounds, colors and live tiles for an experience that's uniquely them.
- They can access all their files, photos and settings, from anywhere, with SkyDrive cloud-based storage and sync.

Why should your customers get excited about the new Windows tablets?

- Windows tablets run Microsoft Office (may be sold separately), optimized for both touch and keyboard devices.
- Windows tablets give your customers the personalization options with backgrounds, colors, and tiles that light up your customers device.
- Windows 8.1 helps your customers get work and play done with multitasking capabilities. They can watch movies and do email at the same time. Plus, they get the familiar desktop that they know and love.
- Windows makes it possible to have multiple user accounts. Your customers can share a device without losing preferences and privacy.

Microsoft Windows 8.1
SKU: 141830 (32Bit), **141833** (64Bit)

Windows 8.1 Professional
SKU: 141835 (32Bit), **141837** (64Bit)

Helping customers choose between Windows 8.1 vs. Windows 8.1 Pro

What's new in Windows 8.1?

The new Windows. The best of work and play on any device.
• More productive: Windows devices and services bring together everything your customers do, at work, at home, or on the go.
• More personal: With Windows, your customers can create a truly one of a kind experience that is made for the way they live.
• More choice: There is a Windows device – tablet, convertible, notebook, all in one – that has the style your customers want, the function they need and the experience that's right for them.
What makes Windows 8.1 Pro the right edition for your customers' businesses?

All the benefits f Windows 8.1, plus:

• More security and control: BitLocker , BitLocker To Go, Domain join, Group Policy.
• Business class capabilities: Assigned access (kiosk), Offline files, Remote Desktop (Host)Client Hyper V.
• Grows with their business: Eligible for future volume license upgrades. Eligible for Windows Enterprise, 24/7 support and training and more, all through Software Assurance.

BYD* T11B

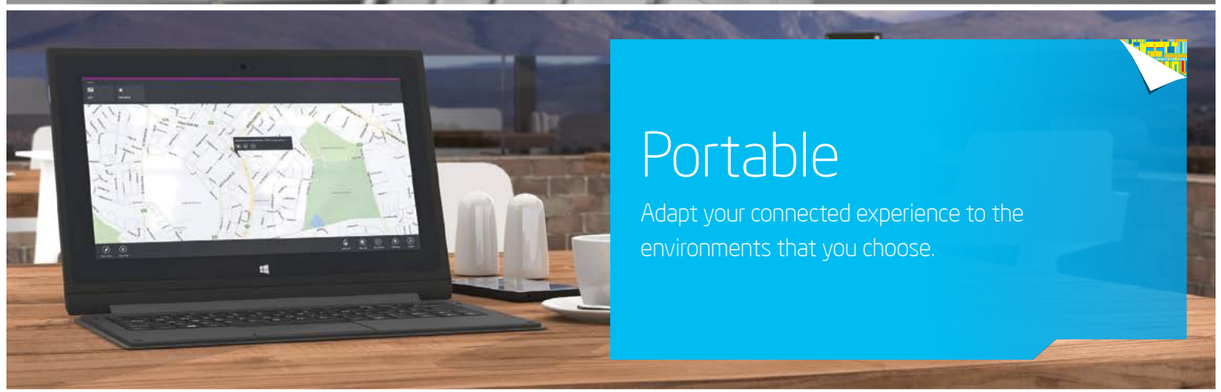
Intel® Channel Access Program

2 in 1 - A laptop when you need it, a tablet when you want it

The T11B provides great interactive touch, and when paired with the optional keyboard, allows you to be highly productive.

Connected

Stay connected with Microsoft* OneDrive. Keep up to date with emails, projects and chats as you connect using wireless hot spots.



Portable

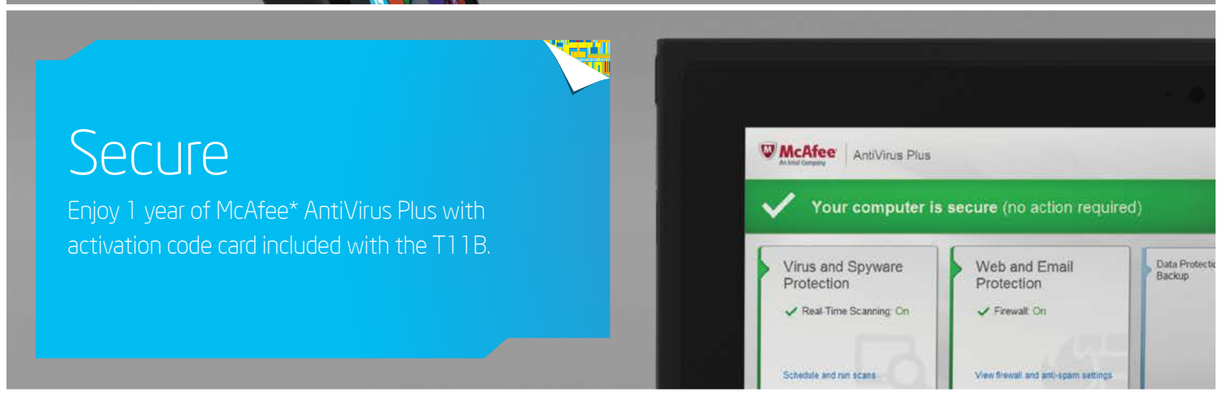
Adapt your connected experience to the environments that you choose.

BYD* T11B

Intel® Channel Access Program

Interoperable

Customize settings, apply updates and make changes to your 2 in 1 easily with Windows* 8.1. Connect to supported devices via the available Mini-HDMI, Micro USB, Wireless LAN and Bluetooth* interfaces.



Secure

Enjoy 1 year of McAfee* AntiVirus Plus with activation code card included with the T11B.

Accessible

Connect to an extensive range of Windows* applications available through the Windows* Store. Easily access and install the applications you need to define your experience.

Crucial® MX100 SSD

The choice between speed and capacity is over. Choose both.

Traditionally, SSDs have offered powerful speeds and extra features, but at a high cost per gigabyte. Enter the Crucial MX100 SSD. Leveraging years of R&D and the latest NAND technology, the Crucial MX100 offers a low cost per GB, combined with unrelenting performance and one of the most complete feature sets available.

SKU: 153913, 153914, 153915

Feature-packed capacity. Proven reliability.

The Crucial MX100 provides plenty of cost-effective storage for your photos, music, videos, and documents—all while backing your data with a higher level of reliability than a hard drive or competing SSD.

Run your system longer than ever before—using less power.
With Extreme Energy Efficiency technology, the Crucial MX100 is up to 89% more energy efficient than a typical hard drive.[1]

Protect all of your data—even if the power goes out.
With Power Loss Protection, if you happen to be saving a file and you suddenly lose access to power, your data will still be preserved.

Keep your memories, photos, and files safe.
When a photo or file gets corrupted, it often becomes unusable. Prevent this from happening in the first place with the Crucial MX100 SSD, which arms every storage component with four layers of Exclusive Data Defense to guard against corrupt files.

Push your drive to the limit and avoid overheating.
Adaptive Thermal Protection technology enables the Crucial MX100 to dynamically adjust storage component activity based on how you're using the drive, allowing your system to stay cool and react to changes in use.

Unrelenting performance. Top-notch security.

Boot up almost instantly. Load programs in seconds. Accelerate demanding applications. And encrypt and protect your data with no loss in performance.

Do more—faster.
Get true 550 MB/s sequential reads on both compressible and incompressible data—and leave your old 177 MB/s hard drive in the dust.[2]

Save and transfer files in seconds rather than minutes.
Our exclusive Native Write Acceleration technology spreads the drive's workload across several elements, enabling you to write data in seconds rather than minutes.

Get best-in-class hardware encryption.
Keep personal files and sensitive information secure from hackers and thieves with AES 256-bit encryption—the same grade used by banks and hospitals. The Crucial MX100 is one of the only drives available that meets Microsoft® eDrive®, IEEE-1667, *and* TCG Opal 2.0 standards of encryption.

Attain consistently fast speeds without compromising the reliability of your data.
Our engineers created RAIN technology to protect your data at the component level, similar to how RAID is used with multiple hard drives. This enterprise-class technology increases the security and protection of your data to a level that's rarely available in consumer-class SSDs.

ASUSPRO Notebooks

BestForBusiness

ASUS has engineered the high quality and reliable ASUSPRO lineup to help businesses boost productivity and lower total cost of ownership. Here is why the notebooks are best for business:

Renowned Reliability: ASUS is a three-time winner of the PC Mag Readers' Choice Award[1] for Laptops.

Extreme Testing: Select models meet US Military standards, ensuring top-notch durability and quality.

Comprehensive Coverage: Accidental Damage Protection[2] covers accidental damage such as liquid spills, electrical surges, and drops within the first year from the date of purchase. Click here to view a video on ADP.

Choose What Works for You: Experience the familiarity and compatibility of the Windows® 7 Professional option or the beautiful, fast and fluid Windows® 8.1 Professional option.

ASUS ADP
One Year Accidental Damage Protection

Office

Why Upgrade FAQ

Why should I upgrade to the new Office?

The new Office gives you access to the latest Office applications, helping you and your employees to be more productive. In addition, it provides non-security hot fixes, free and paid assisted-support options, and technical content updates. You can also save your documents in the cloud on OneDrive and access them virtually anywhere.

Which new Office should I buy?

Office Home & Business 2013 provides the latest versions of Word, Excel, PowerPoint, OneNote plus Outlook on 1 PC. Upgrade to **Office Professional 2013**[1] and get Access and Publisher.

- Office on one PC for business and household use.
- One time purchase for the life of your PC[2].
- 7 GB of online storage in OneDrive.
- Free Office Web Apps[3] for accessing, editing and sharing documents.
- An improved user interface optimized for touch, pen, and keyboard.

Office Home & Business 2013

1 install includes: Word, Excel, PowerPoint, OneNote and Outlook

Office Professional 2013

1 install includes: Word, Excel, PowerPoint, OneNote, Outlook, Access and Publisher

What do I need to do?

It's simple: Buy Office Home & Business 2013 or Office Professional 2013 right away.

- Easily incorporate content from PDFs into your Word documents
- Use Recommended Charts to visualize your Excel data and draw conclusions in less time
- Focus your reading experience with Read Mode for Word

Download Microsoft Office FAQ

Can someone open Office documents using earlier versions of Office?

Yes, a person with a previous version of Microsoft Office can easily open documents created with the latest release of Office by using compatibility and service packs found at www.office.com.

About OneDrive

What is OneDrive?

OneDrive is a service that enables you to upload files to cloud storage and then access them from a Web browser, PC or devices—no manual syncing or cables needed. Use your OneDrive storage and you'll never be without the documents, notes, photos, and videos that matter to you. Just log on to a web browser, sign in to OneDrive.com, and go to work viewing or editing.

Why does Office save documents to OneDrive?

Saving your documents to OneDrive allows you to easily access and edit them on multiple devices from virtually anywhere.

Are my documents stored on OneDrive also available offline?

Yes. For most PCs, when you save a document in Office, the default option saves it to a local OneDrive folder on the computer, which automatically syncs to OneDrive online. You can access your documents in the local OneDrive folder on your computer at any time, even if you are not connected to the Internet.

Download and install Office

What is my Microsoft account and why do I need it for my Office software?

A "Microsoft account" is the new name for what used to be called a "Windows Live ID." Your Microsoft account is the combination of an email address and a password that you use to sign in to services like Hotmail, Messenger, OneDrive, Windows Phone, Xbox LIVE, or Outlook.com. If you use an email address and password to sign in to these or other services, you already have a Microsoft account—but you can also sign up for a new one at any time.

Is Internet access required for Office?

Internet access is required to install and activate all the latest releases of Office suites. After purchase, you must visit www.office.com/setup to enter a product key and create an account (using a Microsoft account). Internet connectivity is also required to access services such as OneDrive.

With this release of Office, you can associate your Microsoft account with your Office subscription.

You need to sign in to your account or create a Microsoft account when you install the latest Office suites. The Microsoft account you use to install your Office suite will be the one you sign in with every time you want to manage your account; for example, when you install Office on a new computer. Any time you want to install Office on another PC, choose a new language for an installation, or make other changes to your account, all you have to do is return to www.office.com/myaccount and sign in with your Microsoft account.

How do I install Office Home & Business 2013 or Office Professional 2013?

After purchasing the software, go to www.office.com/setup and follow the onscreen instructions. You can install Office on one PC.

How long does it take to download and install Office?

Office installs more quickly than ever, thanks to Click-to-Run, a streaming technology that lets you begin to use Office applications before installation is complete. All versions of the new Office use Click-to-Run. The actual download speed depends on the speed of your Internet connection.

Should I install the 32-bit or 64-bit version of Office?

The 32-bit version of Office is installed by default. Even if your computer is running a 64-bit version of Windows, we recommend that you install the 32-bit version of Office, because it is more compatible with the applications and add-ins that work with Office.

How do I obtain a back-up copy of my Office product?

You may order a DVD back-up copy for Office Home & Business 2013 or Office Professional 2013 for a fee. Visit www.office.com/downloadoffice for details. Back-up copies are available in limited markets.
